

EMEA

Capability

Overview

Exceeding expectations

From the network core to service delivery edge, Netceed offers a wide range of tailored products, materials, and solutions backed by more than 30 years of expertise and technical performance.

Our comprehensive portfolio of passive materials, active equipment, and tools, through strong, long-lasting relationships with industry-leading partners, is comprised of more than 90,000 SKUs available from nearly 1,500 global sourcing and supply partners. We also provide a wide range of value-added services including CPE refurbishment & repair, product development, system integration, network installation, project management, and logistics solutions supported by our global team of service delivery experts.

With a commitment to delivering a customer experience to fit your unique needs focused on supporting your critical projects and operations, our team is dedicated to helping shape the future of communication networks across the globe.

Best-in-class products and solutions

By supporting cable operators, telecommunications service providers, rural utility providers, electric cooperatives, and contractors with a full range of products and solutions, we are powering HFC, FTTH, FTTx, wireless, 5G/mobile, and data center technology performance.

An insight into our product and service portfolio

Active Solutions

- PON and DOCSIS access solutions
- G.fast and G.hn concepts
- Security
- Routing and Switching
- E2E Managed WiFi
- E2E CCTV
- Transceivers
- CPEs

Data Centers

- Server and AI-ready racks
- Fiber connectivity and containment
- Power and cooling
- Micro data centers
- Physical security

Enterprise Infrastructure

- Structured cabling and LAN products
- Fiber connectivity
- Cabinets and accessories
- Cable management and containment

Fiber Infrastructure

- Fiber optic cables
- Passive cabinets
- Fiber indoor infrastructure
- Fiber underground infrastructure
- Closures
- Terminals
- Aerial infrastructure

Hybrid Fiber Coax (HFC)

- Antenna wall outlets and POAs
- RF and fiber wall outlets
- Distribution passives
- Network conditioning passives
- Coaxial cables
- Connectors and cable fittings
- RF amplifiers
- Optical nodes
- Optical amplifiers and transmitters

Test & Measurement, Tools and Consumables

- Hand tools and consumables
- Fusion splicers
- Blowing equipment
- Fiber test equipment
- Coax CATV test equipment
- Copper test equipment
- LAN & ethernet test equipment
- RF & wireless test equipment

PoPs

- Large and mini POPs
- Hybrid cabinets
- PatchRobots

Services

- Logistics Telco-Specialized Services
- Refurbishment
- Repairing Services
- Network planning
- System integration
- Network installation
- Project management

Your go-to for sophisticated network solutions

End-to-end network solutions and value-added services

We understand that selecting a services vendor is a strategic decision that is essential in a successful network deployment. Your subscribers depend on you to deliver reliable, high-speed broadband connections that are critical to your community's future development and well-being.

Our certified engineers and technicians can help you plan, deploy, and maintain your network, while our expansive range of services provide worry-free supply chain management solutions. From preliminary feasibility studies and architectural decisions to expertly configured and commissioned solutions, our experienced and passionate network experts help you succeed.

Supply Chain & Logistics

- State-of-the-art distribution centers
- Global product sourcing and procurement
- Forecasting and inventory management
- OEM services
- Quality control and audits
- Next-day deliveries
- Reliable relationships with $\pm$ 1,500 global sourcing and supply partners
- International exports

Technical Expertise

- Network advisory, design, and planning
- Product design & development in our own state-of-the-art research & development innovations labs
- Netceed product lines and further own brands
- Multi-vendor custom configurations
- Engineering services

Sophisticated Services

- System integration
- Network planning, installation, maintenance and fault clearance
- Project management for large-scale FTTH network construction
- Workshops and trainings
- Pre-installation of network equipment
- Cable cutting
- CPE and electronics refurbishment & repair services
- Custom product development according to your needs
- 24/7 TAC (Technical Assistance Center) with ticketing system

Flexibility that breaks the mold

Customized for you

We believe that customers deserve customization. With flexible delivery models, a plug-and-play approach, and modular set of value-added services, we're your trusted partner to support your business needs from basic procurement to supply chain management, and everything in between.

The materials you need

We supply the products, materials, state-of-the-art tools and test equipment from the largest top-quality manufacturers for telecommunications providers, tier 1, 2, and 3 cable operators, rural utility providers, electric cooperatives, and contractors. From the headend to the home, we've got you covered with anything you need for the network.

The reliability you want

You can count on us. Our timely focus will support your critical projects and operations, so you can focus on building, maintaining, and growing the network.

Save time

Our technical and logistics expertise, and our utilization of supply chain technologies help simplify and optimize your operations, allowing you to focus on your business knowing the supply chain is well managed.

Save money

Our scale and expertise translate into significant operating and purchase cost benefits for our customers, letting you focus on helping your subscribers connect to the people and things they love.

Simplify your operation

Communications carriers have trusted us to help navigate through industry changes, opportunities for growth, and technological advances. We connect the right mix of people, products, partnerships, and processes in order to consistently deliver on commitments to excellent service and unsurpassed value. We're your go-to to get things done with a comprehensive portfolio of network core to service delivery edge materials, complete solutions, dedicated support, and value-added services.
