

A trusted partner

Netceed is a global infrastructure supply chain solution provider that enables the critical networks modern society depends on.

With more than 30 years experience in broadband, we connect the world and combine global reach with local expertise to deliver integrated supply-chain solutions and end-to-end services. Through steady growth and strategic acquisitions, we've expanded our leadership into data center and energy infrastructure. Today, our portfolio spans 90,000+ SKUs from nearly 1,500 trusted partners worldwide.

We provide solutions that drive your network forward with a comprehensive portfolio of passive materials, active equipment, and tools,

backed by value-added services such as CPE refurbishment, product development, system integration, network installation, project management, and tailored supply-chain solutions. Serving the full ecosystem, we support cable operators, telecom providers, rural utilities, electric cooperatives, contractors, and more across HFC, FTTH/FTTx, wireless, 5G, data center, and energy infrastructures.

Our services are powered by 1,500 experts in 21 countries who deliver smarter, stronger, and more sustainable connectivity through collaboration, commitment, and excellence.

We build connections

netceed.com

Powering smarter, stronger, and more sustainable cutting-edge solutions

We simplify the complex

We help customers navigate fast-changing technologies and markets by breaking complexity down into clear, actionable solutions.

Active Solutions

PON and DOCSIS Access Solutions
G.fast and G.hn Concepts
Security, Routing and Switching
E2E Managed WiFi
E2E CCTV
Transceivers
CPEs

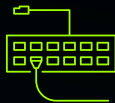

Data Center

Fiber Connectivity and Containment
Power and Cooling
Server and AI-Ready Racks
Physical Security
Micro Data Centers

Energy

Gas
Water
Electricity

Enterprise Infrastructure

Structured Cable and LAN Products
Fiber Connectivity
Cabinets and Accessories
Cable Management and Containment

Fiber and Infra

Fiber Optic Cables
Passive Cabinets
Fiber Indoor Infrastructure
Fiber Underground Infrastructure
Closures, Terminals
Aerial Infrastructure

Hybrid Fiber Copper (HFC)

Antenna Wall Outlets, RF & Fiber Wall Outlets, Distribution Passives, Network Conditioning Passives, Coaxial Cables, Connectors and Cable Fittings, RF Amplifiers, Optical Nodes, Optical Amplifiers and Transmitters

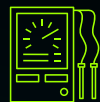

PoPs

Monoblock Structures
Large & Mini PoPs (Active Cabinet)
Design
Customization
Hybrid Cabinets
PatchRobot
Integration

Services

Logistics Telco-Specialized Services
Refurbishment
Repairing Services
Network Planning
System Integration
Network Installation
Project Management

Test & Measurement (T&M), Tools and Consumables

Hand Tools and Consumables
Fusion Splicers
Blowing Equipment
Fiber Test Equipment
Coax CATV Test Equipment
Copper Test Equipment
LAN & Ethernet Test Equipment
RF & Wireless Test Equipment

Supply Chain & Logistics

- Materials Distribution
- State-of-the-Art Distribution Centers
- Global Product Sourcing and Procurement
- Forecasting and Inventory Management
- Management Services
- Product Design, Manufacturing, and Own Product Lines
- OEM Services
- Transportation Fleet
- Vendor-Managed Inventory
- Quality Control and Audits
- Exports and International Drop Shipping
- Supply Chain Integration, Management, and Warehousing

Technical Expertise

- Network Advisory, Design, and Planning
- Multi-Vendor Custom Configurations
- Engineering Services
- Product Design & Development in our own state-of-the-art research & development Innovations lab

Value-Added Services

- Integration Services
- B2C Distribution
- Pre-Wired Enclosures and Cabinets
- Custom Network Deployment Kits
- Kitting and Assembly
- Pre-Configured Equipment
- Pre-Cut Fiber
- Customer Asset Management Program
- Installation Services
- Managed Services
- Maintenance Services
- CPE and Electronics Refurbishment & Repair Services
- Cable Cutting
- International Exports

Our goal is not just to deliver what's needed now, we are ready for what's next.
