## Core to Edge Product Portfolio

Netceed collaborates closely with many major manufacturers across a wide portfolio of product, enabling you to source your entire project from one supplier. We have achieved Elite Partner status with major brands such as AFL, CommScope, and HUBER+SUHNER, guaranteeing that we can offer best pricing, technical support, and ample stock availability.

## Sourcing & Procurement

With our huge network of teams with far reaching relationships, coupled with our incredible purchasing power, we are able to supply products that may not be in our standard portfolio, ensuring we are perfectly positioned to manage your end-to-end supply chain.

## Forecasting & Inventory Management

The powerful combination of our advanced stock management systems and our highly experienced team ensures we can accurately manage stock levels throughout the business, guaranteeing that we always have what you need, when you need it.

## Warehousing & Storage

Netceed is perfectly positioned to support European and EMEA projects. Our 190,000 square foot warehouse contains over £20 million worth of products, available for next day delivery anywhere in the mainland UK. Changes to your plans can occur last minute, and our teams are prepared to accommodate them.

## Logistics & Tracking

Delivery tracking information for all orders placed with us is available via our website, allowing you to see the location of your delivery at any time. We also have a dedicated team of Customer Service experts, who will ensure that any courier issues that may arise are handled quickly and with minimum disruption to your project.

## Dedicated Programme Management Team

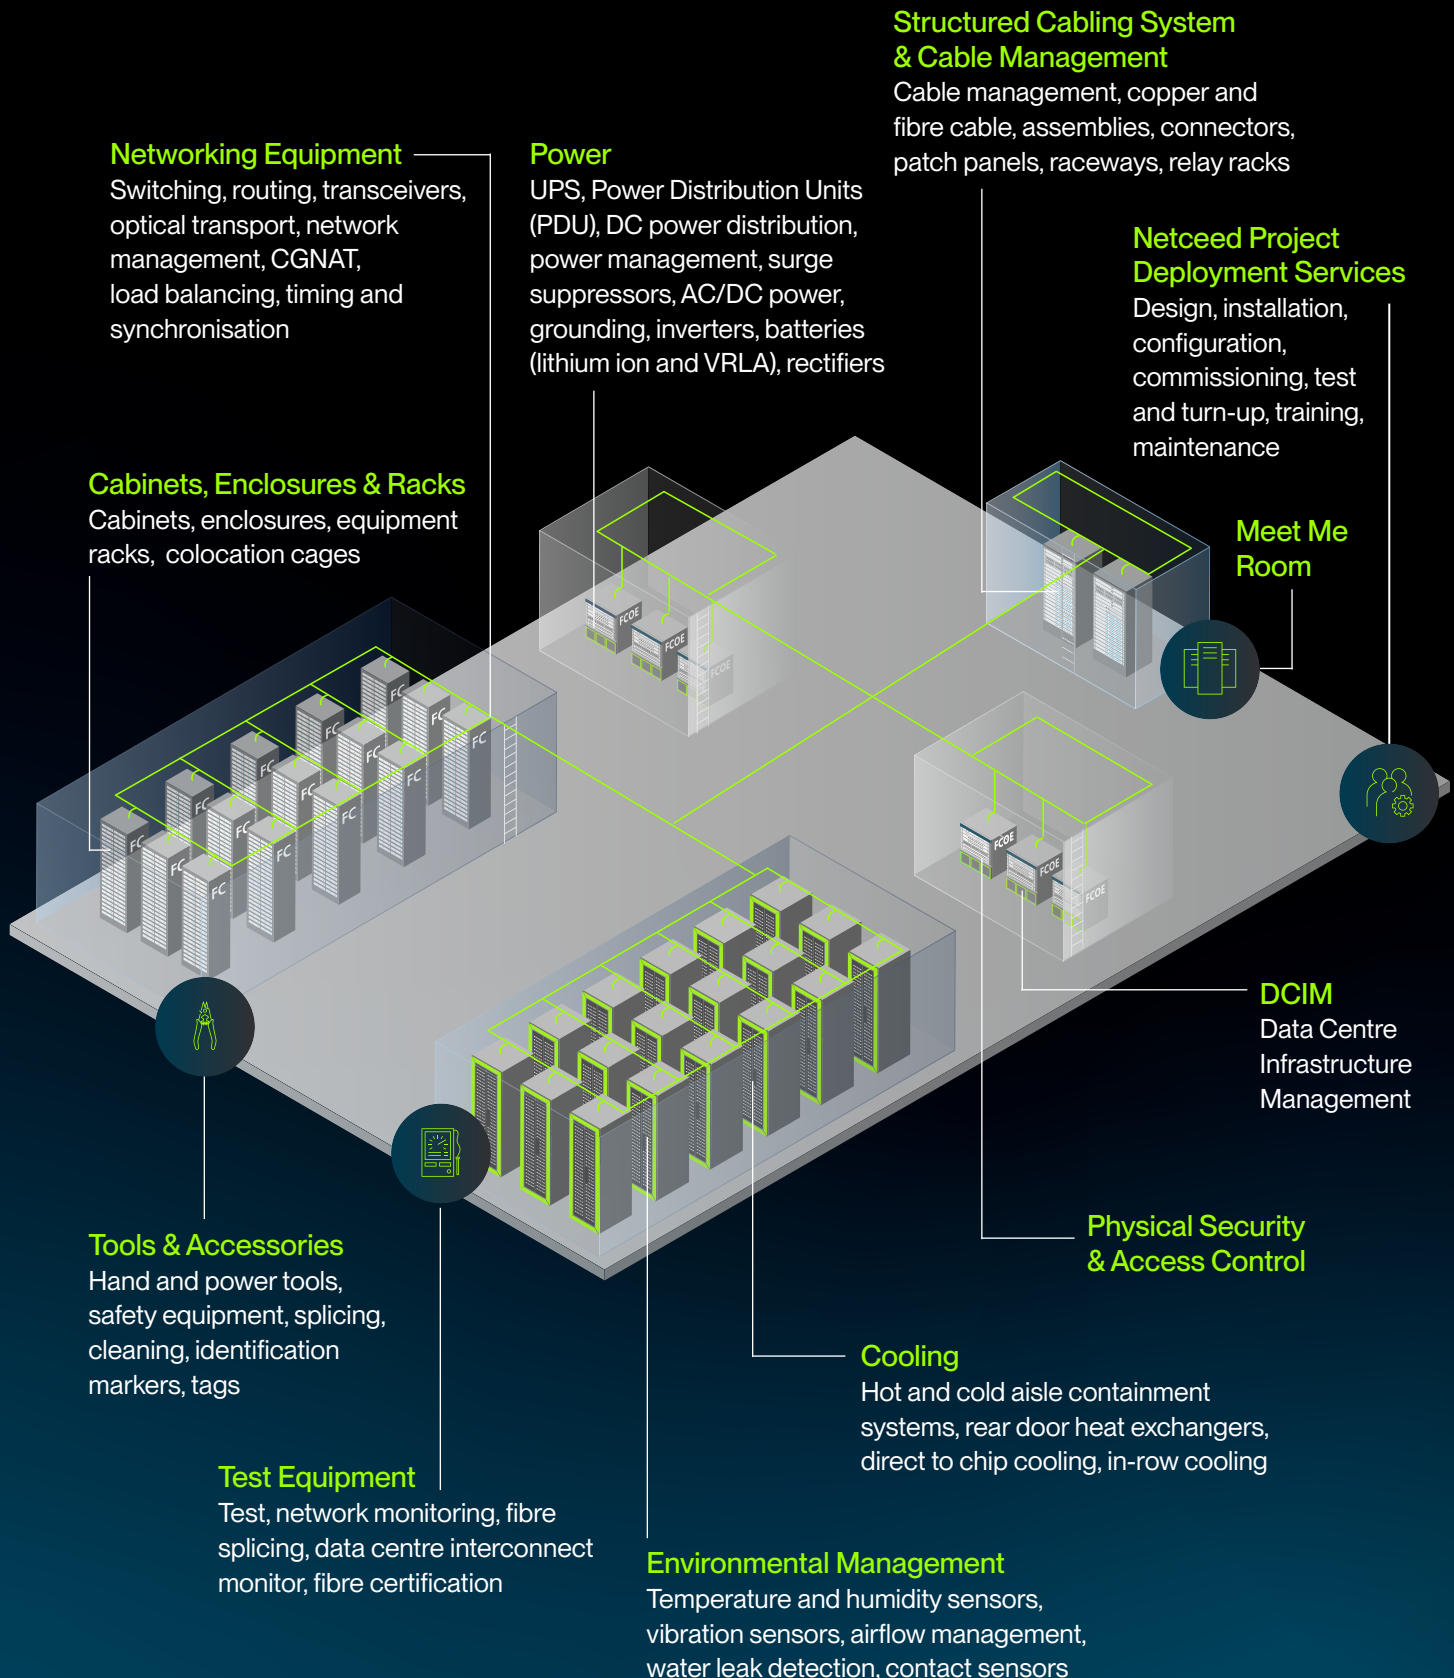

Our team will work closely with you to manage your project deployments. We will ensure that the right products are delivered to the correct location at the right time. You will receive regular updates from us through phone calls, so you are always informed. We will make sure that any changes are effectively communicated and implemented in a timely manner.

## Our trusted partners

# Delivering end-to-end data centre connectivity solutions

### What makes us different?

- Leading brands all under one roof
- Dedicated team of experts
- Forecasting & inventory management
- Nationwide warehousing & storage
- Efficient logistics solutions

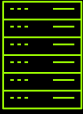

### Netceed Services

Netceed offers a suite of value-added services, from design and installation to configuration, testing, and maintenance.

Co-delivered with trusted partners, our services ensure smooth implementation and ongoing support for all your data centre needs.

### Cabinets, Enclosures, and Racks

Netceed offers a comprehensive range of cabinet and racking solutions, tailored for single-tenant and co-location environments. Our customisable products deliver the functionality, accessibility, and environmental control needed to meet any infrastructure requirement.

### Cooling

Ensure efficient cooling for your critical infrastructure with our hot and cold aisle containment systems and direct chip cooling. Our liquid cooling solution reduces OPEX by up to 40% and would allow your infrastructure to run more efficiently with lower PUE.

### Data Centre Infrastructure Management (DCIM)

Take control of your data centre with our DCIM solutions. By integrating real-time monitoring, asset tracking, and environmental management, our DCIM tools provide full visibility and automation to optimise operational efficiency and reduce downtime.

### Environmental Management

Manage your infrastructure with Netceed's full portfolio of Environmental Management including temperature and humidity sensors, water leak detection and vibration sensors. When integrated with a DCIM software, our solution allows you to monitor, manage and mitigate risk within your data centre.

### Networking Equipment and Energy-Efficient Transceivers

Equip your data centre with top-tier networking products, including spine/leaf switches, routers, firewalls, and wireless systems. Our innovative active solutions best fit your AI computing, cryptocurrency, and cloud architectures, and optimal performance.

### Power

Safeguard your infrastructure with our power management solutions, featuring integrated UPS systems, PDUs, and AC/DC power distribution tools. Our comprehensive range ensures reliable power delivery and protection for any data centre application.

### Test Equipment and Splicing

Ensure network integrity with our comprehensive testing tools. We provide copper and fibre test equipment for installation, certification, and troubleshooting, ensuring seamless connectivity and optimal performance.

### Structured Cabling System and Cable Management

Optimise your network performance with our cabling and connectivity solutions. Our high-performance copper and fibre systems support high-density, high-bandwidth data infrastructures, driving down costs while enhancing system reliability application.

### Tools and Accessories

Netceed provides a complete range of hardware tools to meet the demands of any data centre project. Our offerings include cable pullers, wire strippers, crimpers, ladders, splicing kits, safety harnesses, and more. Whether you're cutting, terminating, or testing fibre and copper cabling, we offer the precise tools needed for installation, maintenance, and upgrades.

### Physical Security and Access Control

Leading building entrance solutions and physical security that is adapted to how you operate day-to-day. Entrance security solutions approved to LPS 1175.
